IN 1872, the Mississippi River, with its palatial steamers, was one of the chief avenues of the nation's commerce. In that year, A. Montgomery Ward originated the mail order business, opening up a new highway of trade and bringing to the people all over America the low prices of the city markets on goods of standard, serviceable quality.

During all these fifty-three years, Mr. Ward's policies of honest goods at lowest prices have been carefully followed.

"We never sacrifice quality to make a low price."

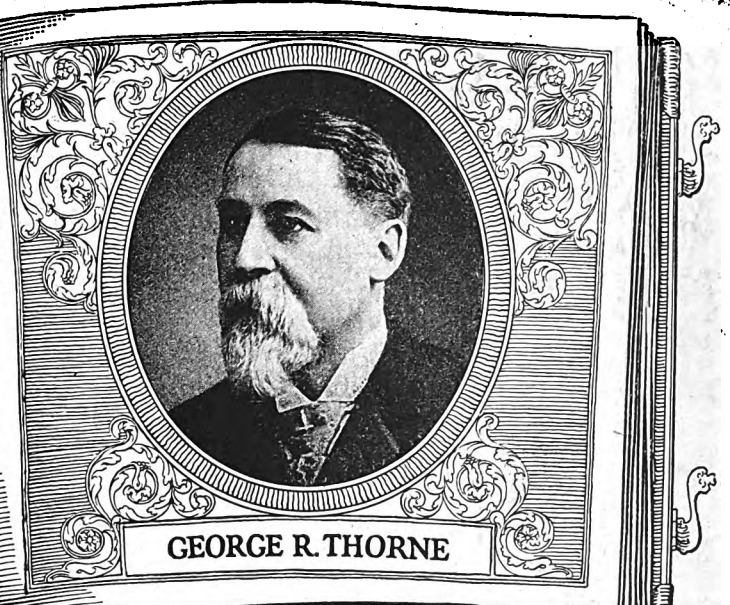
A. MONTGOMERY WARD



GEORGE R. THORNE

ORIGINATORS
OF THE MAIL ORDER BUSINESS
and of the mail order guarantee

IN 1872 Montgomery Ward, then an unknown young man, founded Montgomery Ward & Co., the First Mail Order House. And from that small beginning has grown the mail order business as we know it today.

Montgomery Ward's name now stands as one of the greatest merchants of the world. And yet his world-wide fame does not rest merely upon the fact that the idea of selling goods by mail was his —but upon the far-sighted policies he laid down for the conduct of this great business.

He and his partner, George R. Thorne, agreed to sell only goods of standard quality. They said, "We will never sacrifice quality to make a seemingly low price." And so they put a guarantee back of their goods, they were the first to print a mail order guarantee, "Your Money Back If You Are Not Satisfied."

HERE were two of the greatest changes ever made in business, two of the most far-reaching new policies ever laid down. And those who have followed Mr. Ward and Mr. Thorne have carefully, conscientiously lived up to these principles.

Among the other legacies left to this business was Mr. Ward's great spirit of improvement, of advancement, of progress. "Be the first in all you do. Lead in giving good service, lead in giving big values, lead in giving low prices on reliable goods."

His spirit of leadership still dominates Montgomery Ward & Co. His vision in establishing this business in 1872 made Montgomery Ward & Co. the Oldest Mail Order House. His Spirit of Progress, abiding in our present organization, makes it today also the Most Progressive.

TO the best of our knowledge the First Mail Order Catalogue in book form, was published by Mr. Ward in 1874. It contained but 8 pages and was 3 by 5 inches in size. The sketch below was drawn from an Original Copy in our possession. From 1872 to 1874 our merchandise was sold from single sheet price lists mailed in envelopes.

Our Guarantee

It is our intention that every article in this book shall be truthfully described and be exactly as pictured.

Therefore we guarantee everything you buy from us to be satisfactory to you in every detail and to reach you in perfect condition.

You take no risk whatever in sending us your order, for unless you are completely satisfied with the goods and with your saving, you may send back anything you buy from us and we will promptly return your money and all transportation charges you have paid.

MONTGOMERY WARD & CO.

THE small circle indicates the Birthplace of the Mail Order Business, a single room about 12 by 14 feet in which A. Montgomery Ward began to sell goods by mail in 1872. The building itself was one of the first and finest erected in Chicago after the Great Fire and still is in use as a business block at 825 N. Clark Street, near our present Chicago home.

Our Chicago Store Gives You Better and Quicker Service

THIS 1925-26 Fall and Winter Catalogue brings another big improvement in service to the customers of Ward's Chicago House—an improvement that we believe will set a new standard of mail order service.

We have just opened a big, new store in Baltimore to serve the Atlantic Coast States. And within the past year we have made big additions to four of our houses in other territories. Millions of customers who formerly sent their orders to Chicago will now be served by these other and closer stores. From now on our 40-acre Chicago Plant, our thousands of trained employees at Chicago, will be devoted to the exclusive service of customers who live in the central states shown on the map below.

Your orders will now be handled with greater speed than ever before. Practically every order will be shipped within 24 hours.

Ward's Service Brought Closer

Your goods will also reach you in the shortest possible time after they are shipped. Chicago House is ideally situated to give quick deliveries to every point in the states that it now serves. It is located directly upon the tracks in the world's greatest railroad center. Hundreds of trains daily carry our merchandise to customers in this territory in the shortest time at the lowest cost for transportation.

Ward's plan of serving customers by seven great separate mail order houses has brought our service closer to every customer than that of any other mail order house.

The growth of Montgomery Ward & Co. which has broken all records these past few years, the growth that has made these great new plants possible, is due to two things —merchandise quality and improved service. It is a fixed policy at Ward's to sell only merchandise of dependable quality. When you send your orders to Ward's, you know the quality will be right, that your orders will be filled accurately and that the goods will reach you quickly.

Greater Savings Than Ever for You

Ward's great growth has brought increased savings to every customer. Our seven big houses now buy more than $125,000,000.00 worth of goods each year and serve more than 7,000,000 families. Buying in such enormous quantities and always paying cash, we can command rock-bottom prices on goods of superior quality. These advantages we pass on to you.

Never in our 53 years' experience have we been able to offer such values—such low prices on high quality merchandise as we offer today. Look through this catalogue. Study our merchandise and compare our prices with what you would have to pay elsewhere. And remember, every article you buy at Ward's is sold under our 53-year-old policy "Satisfaction Guaranteed or Your Money Back." It is your continued good will and friendship we want most, for that is the foundation on which our success has been built.

For the quickest service, the best values, send your orders to Ward's. We are always glad to hear from you, and as Manager of Ward's Chicago Store I promise you our best attention to every letter and every order.

"Why I Buy from Ward's"

THE LETTERS our customers write, telling why they like to buy at Ward's, mean much to us. We appreciate especially the spirit of friendship which prompts these letters.

To make a friend of every customer—that was Mr. Ward's ambition when he founded the first mail order house 53 years ago, for he knew that his success would depend upon the good will his service created among customers. How well we have succeeded in maintaining this ideal of service is shown by the steadily increasing patronage Montgomery Ward & Co. has enjoyed throughout the years. Hundreds of thousands of new customers come to Ward's each year, because old customers tell their friends and neighbors of the excellent values, the good service and fair treatment they always get at Ward's.

We are extremely proud of these evidences of friendship and of the kindly letters we receive each day. So we have printed a few of these letters here for you to read.

These letters and the kind words our good friends speak of us, are an inspiration to us to strive constantly to give you greater values and improved service. We thank you and promise that we shall always do our best to merit your continued friendship and good will.

R. E. TEMEN, *Oakland, Calif.*

"About three years ago I chanced across one of your catalogues and was surprised at the low prices. I doubted if the quality would be up to standard and so decided to order several small articles for a trial. I was perfectly satisfied. Since then have made many purchases and I find it more convenient to order by mail than to shop around and waste a lot of time having some salesman try to sell me something I don't want. It is a pleasure to do business with your house."

MR. AND MRS. JAMES N. FRISTOE, *Decatur, Indiana*

"In reading the several testimonials from people who are customers of yours—some say for 25 years. That may seem a long time and it is, but I think our first order was in the winter of 1878, just 47 years ago. We have been satisfied customers ever since. In fact, my wife received a box of merchandise from you only two hours ago, which is strong enough evidence to convince anyone that you are square. The dress worn by Mrs. Fristoe in this picture was purchased of your house. In all that time I think we have had to return unsatisfactory goods only once or twice."

ARCHER E. PUGH, *Peach, Wash.*

"I find it much more economical to trade with Montgomery Ward & Co. I get better goods for less money and have the satisfaction of knowing I am getting a square deal. I find your automobile tires a special bargain—they stand up to your guarantee. I have been buying from you for the last 15 years. My first order was for athletic goods when I was a boy of 15 years. While in Kansas City in 1917 I visited your building and saw how you handle your immense business."

MR. & MRS. JOHN GURDES, *Lakota, Iowa*

"We are sure well satisfied with our orders from Montgomery Ward & Company, as you always make the orders right. And we will always be customers of yours. We have been trading with you for about 2½ years. My parents were customers of Montgomery Ward & Company for a good many years. We will send another order in a few weeks."

[Hundreds of our customers write us "My parents were customers of yours."]

FLORIDA JEAN PHILLIPS
Buena Vista, Fla.

"I am a school girl and most of my toys came from your store because we were unable to find the kind of toys I wanted elsewhere at such reasonable prices. I have much better things than my friends, who give much larger prices for their's. My mother has been your customer for 15 years and my grandmother has been your customer for 30 years or more. We don't believe we could keep house without your catalogue to refer to."

MILTON LEWIS, *Sedalia, Mo.*

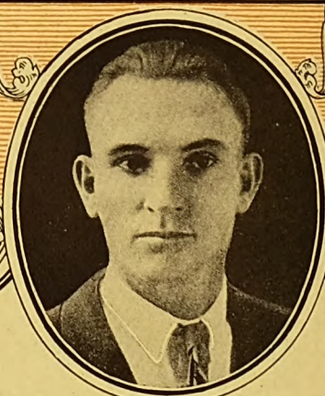
"I have been sending to Montgomery Ward & Co. for 25 years and in all that time I do not recall having any trouble that amounted to anything. Whenever we did not get just what we expected we would send it back and the house would promptly send us just what we wanted without saying a word about it. We like to send to Montgomery Ward & Co. because you do not ask us to buy something else in case we want our money back. We never send in very big orders —nothing over $100— but we send quite often."

MRS. GEO. E. CARR
Union Springs, N. Y.

"I wish to thank you for your promptness in filling my orders and the good condition in which I receive them. I have been a customer of yours between 15 and 20 years and have always been perfectly satisfied with your goods. I have a great many friends outside of my family who think there is no one like Ward's to deal with."

MISS FREDA E. NELSON
Wrenshall, Minn.

"I want you to know that I appreciate your prompt shipment of orders, courteous attention to complaints, fine quality of your merchandise and low prices. I have traded with your house for the last 8 years. I know of no other Mail Order house where one can get the good service one gets at Ward's."



ROBERT N. HILL, *Big Spring, Texas*

"I have been trading with your firm some 20 years and you have always done just what you said you would. I have learned that your guarantee is all that the word implies. Your merchandise is of a very high quality, as good as any carried by the best stores in our towns and cities. It is delivered to our door in a very reasonable time. We never make an order but what we save from 10 cents to 40 cents on the dollar and sometimes 60 cents. When we want anything like we want it, when we want it, you get the order."

President

ESTABLISHED 1872

MONTGOMERY WARD & CO.

CHICAGO KANSAS CITY ST. PAUL BALTIMORE
PORTLAND, ORE. OAKLAND, CALIF. FORT WORTH

To Our 2,000,000 New Customers of the Last Four Years.

To the Vast Army of Our Old Customers, Many of You Customers for Twenty Years, Thirty Years, Yes, Even for Fifty Years.

To All of You I Want to Send a Few Words of Thanks - of Appreciation for Your Patronage.

You have shown that you believe in and know the value of our policy of selling at the lowest possible prices but only selling goods of standard quality.

We never sacrifice quality - serviceability - just to make a low price. We would rather sell you a pair of shoes that lasts six months for $3.50 than a pair that will last only three months and which could be priced at $3.19.

Your increased patronage proves that you have learned that we do not skimp the size of our tires or use less rubber to make a low price; that we do not sell you gingham made with 48 threads to the inch when it should have 64 threads - just to take a cent a yard off the price.

In the past four years you have more than doubled your patronage - more than doubled the number of orders you sent us. We thank you. We welcome all our new customers - the 2,000,000 new families who have been won to Montgomery Ward & Co. by our conscientious effort to sell the right goods at the right prices and to give you good service.

For fifty-three years we have followed the Golden Rule policy upon which this business was founded, and in every transaction with you we will endeavor to "deal with you as we would be dealt by" and so to deserve your continued patronage.

All of us here are at your service. Your letters and orders are always appreciated at Montgomery Ward & Co.

Very sincerely yours,

Theodore F. Merseles

What Well Dressed Women Are Wearing This Season

FALL fashions have arrived. And never were styles more charming than they are in Ward's new Fashion display.

Coats, of course, claim first attention in the wardrobe for the new season; and designers have given such an interesting variety of styles that every woman can choose a model suited to her individual figure and still retain the smartness of the mode. Draped "wrappy" coats with a decided slimness, and the new "flare," both give graceful freedom to the silhouette without altering the fashionable slender lines in the least. The perfectly straightline coat also continues in popular vogue, imparting a youthfulness that is ever fascinating.

Frocks of the dressier type are inclined to follow the path that leads to the flare; while flannels and the other woolen fabrics are developed in the simpler manner, with clever plaitings, pockets and collars.

You never need doubt the correctness of Ward's styles, the quality of the fabrics, or the savings you make here.

Youthful Straight Lines

10 C 516 Napped materials have taken such a prominent place among the fashionable fabrics of the season that we chose All Wool Polaire to develop this smart style. Perfectly tailored in the favored straight silhouette, this Coat gives a becoming slimness to every figure.

Fluffy Mandel Fur (sheared lamb's wool) is used for the collar and cuffs and to finish the side panel effects on the coat. Mandel is one of the soft haired furs with a silky appearance.

The side panels are trimmed with stitching in diagonal effect to match the smaller inset panels on the sleeves. The coat is about 48 inches long, and is fully lined with lustrous striped Venetian.

In every detail of the workmanship this coat is faultlessly tailored, from the smooth fitting shoulders to the last row of stitching. It will be a source of satisfaction to you every time you put it on, because you know that it is correct in style and very well made.

A Special Style Service

For The Smaller Woman

These Coats Also Made In Regular Sizes

Specially Designed for the Small Woman

TO our knowledge we are the first mail order house to offer this special service to the smaller women. Designers who have made a special study of the needs of women from 4 feet 11 inches to 5 feet 3 inches tall, have created for these women the modish Coats shown on these two pages. The designing of these coats makes the small woman seem taller and slimmer; their graceful lines and fine fabrics make her very "littleness" doubly appealing. And how well they do fit. Sleeves, shoulders, lengths, all proportioned just for her—making it unnecessary to have coats tailor-made.

Because the styles are so charming and new, we have also had them made up in women's regular sizes, from 34 to 46 inches bust measure.

How to Order

Women's, Juniors' and Misses' Coats

Ward's Coats gain style by fitting remarkably well. Have no hesitancy about sending for any one of them.

To take bust measurement, simply place tape entirely around the body over fullest part of bust, close up under the arms, being careful not to stretch tape too tightly or allow it to slip down at the back. Send us your exact measurement; do not allow any extra for fullness. For example: If you measure 36 inches over the fullest part of your bust, order size 36.

Lengths of coats are given in each description. If you are shorter than 5 feet 4 inches, see scale of sizes on page 12.

Descriptions of Coats Pictured on Opposite Page

Charmingly Trimmed with Imported Brown Sable Coney

10 C 200 Imported Coney-dyed a rich sable brown, is used lavishly on this lovely Coat of All Wool Suede Velour. Three bands trim each side of the skirt and two bands trim the sleeves. The collar is a new large convertible shape which is extremely becoming whether worn buttoned or open.

Large cord tucks are used to trim the sides of the coat, ending in loop shapes. The back of this coat is plain, and cut very straight. A full lining of Satin de Chine, with a convenient inside pocket. Also warmly interlined throughout.

The tailoring of this coat is remarkably fine and it is of such high grade materials throughout that our price is extremely reasonable. It has the three features which you look for in a garment—style, quality and value. You will make a wise choice by ordering this stylish coat. You will find it unusually lovely in either of the three shades. Length, about 48 inches.

One of the New Corded Materials

10 C 206 Among the successful new fabrics for fall is Bengalaire, a handsome woolen of new corrugated weave, which gives a soft, horizontal ribbed effect. The Coat is straight in line, with semi-raglan sleeves and a large stand-up collar of fluffy light brown Mouffon fur, giving it a rich appearance usually seen only in coats much higher in price.

A clever trimming of buttons, with loops of the Bengalaire, is used on both sides of the coat and up both sleeves. Has two large inserted pockets. Lined fully with Ward's standard Satinette, and warmly interlined so that it is comfortable enough to wear in really cold weather.

The vogue of ribbed fabrics is greater this season than in the past, and they deserve to be popular because of their durability, especially in the woolens. A coat of this type is smart enough to wear for any occasion you choose, and the low price makes it doubly attractive. Length, about 48 inches.

The Graceful New Front Flare

10 C 212 The pleasing ripple of the flare front puts this Coat in the foremost ranks of the new mode. And it is made of Vel Suede—Ward's own Suede Velour, 100 per cent Virgin Wool, of fine firm quality, with a velvety smooth surface and heavy, durable texture. A half belt of the Vel Suede ties in front. The rich banding across the flare is of imported dark Coney Fur, which appears also on the cuffs, and the outside of the smart stand-up collar. Inside the collar are trim cord tucks, repeating the tucks at the sides.

The back of this coat is straight and plain. Lining is of good looking figured Silk Mixed Jacquard, with a handy little inserted pocket at the right side.

A coat you'll be proud to wear anywhere, and one that will give you splendid service and comfort. The colors are practical, becoming shades, and the price is gratifyingly low. Length, about 48 inches.

Beautiful Deep Pile Fabric

10 C 218 Saltona is a silky pile fabric of diagonal weave; and in this Coat it is woven in block pattern to show its depth better. Being a mohair fabric, it has excellent wearing quality as well. Here this handsome material is used in a straightline coat—the designers wisely chose a plain style, for the material is one that does not need trimming. Its simple style is richly set off with great fluffy stand up collar and deep cuffs of Mouffion Fur—a long, silky, light weight fur much in favor this season.

A smart feature of this coat is its new style lining—the upper half of colored Silk Mixed Jacquard, and the part of the lining below the knees—the "kicker" lining—of heavy weight, durable black Faille, making a pleasing color contrast, and a very practical wear resisting feature. The two fabrics of the lining are joined with fancy braid. Well tailored and warmly interlined. Length, about 48 inches.

An Unusual Style and a Bargain

10 C 224 At our very low price, this trim Coat of All Wool Polaire certainly is a bargain. It has all the charm of dressy trimming found on coats of higher price—attractive stitching, and cord tucks which end in tailored arrowheads. With this trimming it has combined the easy comfort and practical wearing qualities of a sports coat. The front is plain, except for big stitched and button trimmed patch pockets, with flaps. Deep turnback cuffs are similarly trimmed.

And topping the coat's smart simplicity is a large stand-up Johnny collar of soft brown Beaverette that fits snugly around your neck, or may be turned back if you prefer.

Here is a coat that will give you splendid service—and with its good style, careful tailoring, and dependable quality, it is one of the best values we are offering to our customers this season. A lovely coat in either of the three popular shades. Striped Venetian lining. Length, about 48 inches.

Heavy Grosgrain Ribbon and Silk Velvet alternates to form the sectional crown. The same kind of ribbon is draped around the crown and ends in generous loops at the side. This hat has a great deal of style, yet loses none of the advantages and comforts of a turban. The popular rhinestone ornament is a novelty that fashionable women in the large cities are wearing.

The band and streamers of ribbon match the color of the Silk Velvet forming the crown and upper brim. The under brim is of Rayon in contrasting color, as shown below.

With its small brim that becomes shorter as it makes its way toward the back, you will find it most comfortable to wear with your suit or coat.

512 C 162 With a dash and style that is truly fascinating, this small Hat will make its way into the heart of every woman who keeps in touch with what is newest. Velvet is used in the sectional crown with pipings in the same color of Rayon, a silky material much like taffeta that milliners everywhere are using. Silk velvet also forms the under brim and flange and the bow. The inside of the upper brim is of Rayon and the fluted ribbon trimming on the crown is the same color.

Wear a felt hat and have the assurance that there is nothing smarter to be seen in hats this season.

512 C 194 One of the best Hats of the season for all around wear is this model of Silk Velvet and Rayon, an artificial taffeta. As though to be in accord with the season, autumn leaves trim the entire front of the hat. Plaited Rayon forms the crown and part of the upper brim. The tiny back brim turns up to make room for the snug comfort of your suit or coat collar. A hat that the woman just past the "youthful" age will particularly appreciate. It will stand a great deal of hard wear.

COLORS: Black with Copenhagen blue, or sand with brown; also Copenhagen blue, wood brown, or navy blue with sand.

A Frock of Smart Simplicity

14 C 46 The majority of our customers are women who like to dress with the good taste for which Americans are famous. But many of them must choose Frocks which are suitable for numerous different occasions. And it is the dress problem of these women which our fashion experts keep constantly in mind when selecting styles.

This Canton Crepe frock is the type which is needed in every woman's wardrobe, handsome and dressy, and suitable to wear almost anywhere. Two plaited panels, which go from shoulder to hem, give long slender lines to the dress, for the straight line style is still very smart and a strong rival of the new flaring silhouette. Below the belt these panels are trimmed with crepe covered square buttons.

The deep becoming V neck has a vestee of rich cream lace, faced with tan georgette crepe. The collar is small, of the new tailored cut. Elbow sleeves are prettily slashed on the outside of the arm. Made of a fine quality of All Silk Canton Crepe.

WOMEN'S SIZES: 34 to 44 inches bust measure. When ordering state bust measurement. Read "How to Order" on Page 47.

14 C 52 Fashion's two favorites, the flare and the jabot, unite to make this Flannel Frock attractive. Each color has the lovely jabot frills of tan georgette crepe and lace which ripple along the sleeves and down the front of the dress giving it great charm. Placed low on the skirt, marking it as very new, are slightly flared flounces. These go around to a wide straight panel in the back which is formed by the long narrow tucks.

Little fancy coin buttons of unique design trim the flounces. Notice the clever new Cavalier collar which may be worn standing, as pictured, or flat. Belt starts at sides and ties in back. Long narrow tailored sleeves.

14 C 58 One of the very smart Plaid Dresses which are seen on the best dressed women everywhere this season. The narrow panels of plain Flannel are so perfectly inserted, and every bit of the tailoring is so exquisite, that the dress has the appearance of a high priced model. Notice how the small collar is held at the neck with a strip of the material of the dress, which is of an unusually good quality All Wool Plaid Flannel. A suede leather belt gives added youthfulness to the dress. The long sleeves have tailored cuffs of the plain flannel, button-trimmed, and the same good looking buttons are used on inserts of plain flannel. Reasonably priced for a dress of this quality.

14 C 62 This season the use of richly colored trimming is a striking style feature. In this case it lends a beautiful enriching touch to a simple Dress of All Wool French Serge. Handsome bands of solid embroidery in colorful flower pattern in shades of blue, green and tangerine form the collar, cuffs, long vest and skirt decoration. The dark color of the dress makes a perfect background for the beauty of the embroidery.

Plaits at the side are part of the skirt, giving it an easy, comfortable width. Small self covered buttons appear on the front of the belt, which ties in back. The long narrow rolling collar is very becoming.

14 C 68 A charming fashion which does not go out of style is that of the straight beaded Dress. This model is lustrous satin faced Canton Crepe with a band of the material used crosswise at the bottom of the skirt to bring out its beautiful sheen. The beading on the brown, black and navy blue dresses is in two tones, little wheels of gold beads combined with iridescent beads matching the color of the frock. The white dress is beaded in white and is suitable for more dressy occasions, such as weddings and parties. A wide band of beading goes entirely around the skirt.

In Ward's beaded dresses, great care is taken that the beads are all on and securely fastened when the dress goes to the customer.

And that is just why this frock will satisfy her. It is made on simple lines in good taste and trimmed with appliques of cut out embroidery. This embroidery is done in several colors; rose, blue and green predominating. Embroidery forms pockets at the top of loose side panels and appears again on sleeves and at neck. Both back and front have stitched tucks which give the panel effect. To the woman who is looking for the most in value, we recommend this dress as an exceptional bargain.

14 C 86 A beautifully tailored Dress of fine Poiret Twill, a material much favored by French designers for its firm, smooth texture, its enduring quality and its adaptability to frocks of this kind. It is simply styled in this straight slip-on model, with effective hand embroidery in black and a rich shade of sapphire blue. The sleeves are long and slender, tailored to that perfection demanded in sleeves on cloth frocks, and there's a narrow twill belt starting at each side of the embroidered center medallion and tying in back.

It is very moderate in price, and the fabric, style and workmanship are so fine that you will be proud to wear it anywhere. And you will be delighted with the long service it will give.

The New Mode in Flannel

14 C 88 This chic Flannel Frock expresses the very latest style. It has the fashionable inverted front plait, called the "kick plait," carried up the entire front of the dress to the collar. And because the inverted plait is in the tan used for the collar and cuffs, it gives the effect of an ensemble costume.

The smoked pearl buttons and loops which hold the dress together over the plait at the waist also add to its ensemble appearance. Cleverly curved pockets at either side are bound with the contrasting tan color, while the collar and cuffs are bound with the material of the dress. A narrow tie of ribbon at the neck. The front of the dress is beltless, but there is a belt in the back, which is plain.

One of the most charming and graceful of the new styles. To any woman's figure it gives the slim lines of youth, yet with plenty of room given by the front plait for graceful movement without constraint. Our price is low for a dress of this type.

Embroidery also fashions the turn back cuffs on the sleeves, and a half belt of the material ties in back. A youthful style for a small amount of money.

15 C 626 All through the fall and winter when daughter is wearing dark dresses, the economical mother keeps her dressed in these practical Bloomers. They save the labor of laundering cotton petticoats, and stand an almost unbelievable amount of the hard service which little girls usually give their clothes.

Our customers order them in such large quantities that we are able to offer the bloomers at very low prices, hardly more than you would pay for the material alone.

In either Ward's standard black Sateen or Navy Cotton Serge, they are very well made, with reinforced crotch and elastic at waist and knees. We suggest that you order one or more pairs of each material. These bloomers are cut generously full to fit growing girls and our prices are greatly below what are usually asked for bloomers of similar quality.

Ward's Special Work Garments

A Work Dress Guaranteed to Wear Six Months

36 C 246 To our knowledge, this is the very first time a guarantee of six full months' wear has ever been made on a work garment for women. And we are so proud of our achievement that we want you to know the whole story of how this wonderful garment was produced.

First of all, we have always felt that women on the farm and women who work a great deal around their own homes and gardens should be able to secure good work garments that will stand plenty of hard wear and repeated laundering and still retain their original neat appearance.

Selecting the Fabric

We knew of course there were plenty of good wearing materials we could use, but we were determined to get one that we could absolutely guarantee to wear six full months. So after carefully inspecting and testing a great many different fabrics, we decided that Tupelo Home-Tex Cloth was the best and strongest material we could find anywhere.

The cotton from which Tupelo Home-Tex Cloth is made is specially grown on a Mississippi plantation and is woven into material in a textile mill right near where the cotton is produced. That is done to secure cotton of sufficiently strong texture to produce a fabric durable enough to be guaranteed for six months' wear.

The next step was the designing, and as you can see, the dress is made in the most serviceable style. The arm holes and sleeves are cut comfortably loose to allow free arm movement, and the convertible collar is becoming to every type of woman. The colors were then considered and as it is a work garment, we chose practical colors that would not show soil quickly—black and navy blue—with a white cotton thread woven in it, giving a very pleasing effect.

Sold Only by Montgomery Ward & Co.

We know that this dress is going to make a tremendous appeal and be very popular with our customers. For that reason we have made a special arrangement with the maker to take an enormous supply, which accounts for the almost unheard of low price we are asking.

Remember, this dress can be obtained only at Montgomery Ward & Co., is guaranteed to give full six months' wear, and we stand back of every claim we make for it.

Popular Reversible Front Service Dress

36 C 335 For the woman who does her own housework and prides herself on her spotless appearance, there is nothing better than this Dress. In either blue Chambray or white Cambric, it is as simple as a uniform and as well tailored as a street dress. Made with both sides of the front exactly alike, even to the buttons which hold the front of the skirt in place. This makes it possible to reverse the the front, giving it the appearance of a fresh dress at a moment's notice.

Like a coat dress, this frock is open down the entire front, which greatly simplifies laundering. The style is becoming to any figure, cut to fit well at the shoulders, but with plenty of room for free movement. Easy to put on—to fasten it you simply pull half of the belt through a slit and button it in back and button dress below at side.

Best of all is the remarkably low price at which we are able to offer it. You can now have two or three dresses for the price which you may have paid in the past for one less useful house dress.

10 C 936 Everywhere smartly dressed young women are choosing the Jumper Skirt. This graceful, youthful fashion has the skirt very slightly flared in accordance with the changing silhouette. It is one of the most youthful modes in several seasons, which accounts for its great popularity.

With a good looking blouse, the jumper skirt makes a costume suitable for general daytime wear, and it is of course, ideal for sports wear. With just the change of a blouse, variety is added to the dress.

In the new Solid Color Cheviot Flannel, a lovely fabric with a soft nap finish, this jumper skirt is very smart, but equally good looking in the All Wool Plaid Flannel, as illustrated. Both models are perfectly tailored and will be very serviceable over a long period of time.

How to Order

Corsets and Girdles

If you have hesitated about ordering a Corset because you were not sure of being properly fitted, read these simple instructions and see how easy it is to order your corset from Ward's.

Take your waist measure (A) over the corset you are now wearing. Then if you want a medium or high bust model, deduct two inches from waist measure to allow for lacing. For instance, if waist measures 28 inches, order size 26. For a front lace corset or a topless model, deduct one inch from actual waist measure.

In all models the bust height is measured from the waist line to top of corset. Front clasp length is length of clasp steel in front; retaining hooks below clasp not included in length.

Guaranteed the Best Sweater Values Offered Anywhere in America

WHEN you see these Sweaters, notice the fine quality of the All Wool yarns, the careful making and hand finishing—the extra heavy weight and full sizing. You will realize at once that Quality has been our first consideration, and that our extremely low price is simply the result of Ward's ability to create bargains that are not found at any other store.

We know that big heavy sweaters like these, made from all high grade wool, are being sold regularly at retail for from $8 to $10. That is why we guarantee the value, and invite you to compare our prices, but also be sure to compare quality. If you can find anywhere in America sweaters of this weight and quality selling at a price as low as $5.98, return the sweater to us and we will promptly refund your money, including postage.

Pure Wool—Extra Heavy Weight—Well Made

These Sweaters are made in the styles most popular with outdoor men and women. They are knitted in the heavy ribbed style, very elastic to get proper fit and comfort.

Every sweater is extra heavy weight, full size and not "skimped" in any way. The average weight of each sweater is about 2½ pounds, so you will agree that we have not used light weight yarns, loosely knit to make the sweater look heavy.

The All Wool yarns for these sweaters were purchased a year ago, last July—at a very low market price. Since then there have been several increases in the prices of raw wool.

Our policy is to save our customers as much money as possible, so instead of raising our prices, we give you the full advantage of our savings and go even further. We have reduced our usual small percentage of profit to make these the most outstanding sweater bargains on the market today.

How to Order

Men's Sweaters

You easily can get a comfortable, well fitting Sweater from Ward's. Simply order a size two inches larger than actual chest measurement taken over shirt. Sweaters are closely knit. You will find that a roomy size will give you much better service than one which fits too snugly. In taking chest measure, be careful not to pull the tape too tightly nor let it slip down in the back.

Manager Department of Knit Goods, Infants' Wear, Corsets, Underwear, Gloves, Hosiery, Men's Furnishings

I often wish I could meet our customers personally. But they number millions, and to meet them face to face is impossible. I can, however, greet you in this printed space; and do it just as sincerely as if we were talking together. And I can not say anything more sincere than this: We want to serve you satisfactorily at all times.

Quality First Is Our Watchword

We always try to give you better values than you expect, because our success depends on your satisfaction. I wish you could look behind the scenes with me for a little while in this great department of Montgomery Ward & Co.'s business. Then you would see for yourself how faithfully our expert buyers and inspectors live up to our standard of quality first.

We Welcome Opportunities to Serve You

Often we overlook something. We are only human. So if you need more information about our merchandise, write to me direct. I shall appreciate the compliment and the opportunity to serve you. That, after all, is my whole aim; to see that our efforts here do result in giving better values than you expect.

How to Order

Men's Underwear

The service and comfort you get from your undergarments depend largely on the way they fit. At Ward's you can be sure of getting the correct size if you follow the simple directions given below.

Union Suits and Undershirts

Measure all around the body at chest (A), over underwear and close up under the arms.

Drawers

Measure all around the body at waist (B), over underwear.

When ordering always state your actual measurements taken as directed. Be careful not to stretch tape measure too tightly, nor allow it to slip down in the back.

Underwear is made in even sizes only, and we state in each description the range of sizes in which we carry that particular garment. Thus, if we say in the description of a Union Suit, "SIZES: 34 to 44-inch chest," we mean the suit is made in the following sizes: 34, 36, 38, 40, 42 and 44-inch chest. Be careful to order your underwear large enough.

Twin Fabric Underwear Knit by a Special Process

The construction of material used for our well known Twin Fabric Underwear is entirely different from any other fabric. Separate threads of wool and cotton are woven into a single material, with the cotton on one side and the wool on the other.

The wool is on the outside where it does not touch you, and can cause you no irritation; only the soft smooth cotton comes in contact with your skin. Yet the wool on the outside gives you all the warmth and protection you need from the cold. The illustration below shows how the wool and cotton threads are knit together so the cotton is all on the inside and the wool on the outside.

For the third season we are offering our customers this fine underwear. During the past two years we have sold a tremendous quantity of these union suits, and thousands of women have written us letters highly praising their superior comfort. And this season we feel certain that thousands more will try Ward's Twin-Fabric Underwear, and be convinced that it is really the most comfortable for winter protection and comfort.

You will find it surprisingly easy to get smooth fitting undergarments from Ward's. Simply follow these simple directions.

Union Suits and Vests

Measure all around the body at bust (A), over dress or slip, being sure that tape measure is over the fullest part of bust.

Drawers and Tights

Measure all around the body at hips (B). This measure should be taken about six inches below the waist line and over the dress or slip.

In ordering, always state actual measurements taken as directed. Do not stretch tape measure too tightly, or allow it to slip down in back.

Underwear is made in even sizes only; and we state in each description the range of sizes. Thus, if we say in the description of a Union Suit, "SIZES: 34 to 44-inch bust," we mean that the suit is made in the following sizes: 34, 36, 38, 40, 42, 44-inch bust. Be careful not to order your underwear to fit too tightly.

Ward's Famous *Fleecydown Cotton Blankets* Extra Warmth Without Extra Weight

THE lowest prices at which Ward's famous Fleecydown Blankets have been offered for years; perhaps the lowest price at which they ever can be offered. Last year we sold these blankets at what we felt was an absolutely rock bottom price; considerably less even than was being asked for blankets of a far inferior quality. Yet now we offer you a still further reduction. This means a saving of almost a dollar over usual retail prices for blankets of this quality.

Standard Fleecydown Quality

Not an ounce of skimping in weight, not a bit of sacrifice in the selection of the extra long, silky fiber cotton yarns from which these blankets are woven. They are the same fine quality throughout. The remarkable reduction in price is simply the result of an unusually fortunate purchase.

Choice of Colors

Every pair is full size and full weight. When we say "a pair" we mean two full size blankets woven in one length; which, when doubled, makes a pair. They are neatly finished with firm stitched ends, and are easy to wash when you follow our directions.

What We Mean by "A Pair" of Blankets

A pair of Blankets is really two blankets woven in one continuous length. Example: A pair of blankets 72 by 80 inches is one long blanket 72 by 160 inches; which, when doubled, makes a pair. If you prefer them separated, it is very easy to cut them apart and stitch in a hem.

Nashua Best Quality Part Wool Blankets

These lovely plaid Nashua Blankets contain 10 per cent wool in the filling. The wool adds to their warmth and service. China cotton is used with the wool. It is carefully selected. The fibers of China cotton are curly, differing from the soft, straight American cotton. This cotton is so treated that after weaving, the blankets have practically the structure of wool. This process, and the character of these cotton fibers, helps to keep the nice appearance of these blankets even after years of wear and laundering. Ends of blankets have wide sateen binding to match colored pattern.

Unusually Durable and Practical

Tests have proved that Nashua Blankets will be serviceable for years after the ordinary blanket has worn out. They retain their fluffiness when laundered, if squeezed and dipped up and down in warm suds instead of rubbing in a machine or on a board. They are warm and will give comfort during the cold weather. Attractive colors. Priced much lower than you would have to pay for this quality at retail stores.

Ward's Pride All Wool Blankets

Descriptions of Blankets Pictured in Color on Opposite Page

Look at the pictures on the opposite page and see the luxurious softness and beauty of Ward's Pride Blankets. When you feel their fleecy warmth and their deep fluffy nap, you will wonder how we can sell these All Pure Wool blankets at such a low price. The story of this big bargain is simply this: Buying direct from a large mill in the greatest wool growing district in the west, and selling direct to you at one small profit, means marked savings in production and distribution costs; savings of which you get the full benefit in these low prices. That is why Ward's prices for these extra fine blankets are so much less than is usually asked for the same superior quality.

Every Thread Pure Wool—Clean and Sanitary

Ward's Pride Blankets are made entirely from long staple wool thoroughly scoured and finely carded; clean all the way through. Not an ounce of reworked wool in them. This soft new wool means added warmth without extra weight. The thick nap insures comfort in the coldest weather. They are made in full sizes to tuck in generously all around.

You will find the colors of these blankets very pleasing with their pretty block checked patterns of white with your choice of blue, tan, pink, rose, lavender, or gray. When properly laundered the colors absolutely will not run or fade. No danger of the blankets shrinking either. Full instructions for washing are included with each pair.

Each pair of Ward's Pride Blankets comes to you carefully wrapped and enclosed in a special container. They will reach you absolutely clean, fresh and sanitary, just as they left the mill.

Supply Your Winter Needs at Big Savings

When we say "a pair" we mean two full length blankets woven in one length. Therefore a pair of blankets 66 by 80 inches is really one long blanket 66 by 160 inches; which, when doubled, makes a pair. Most housekeepers find it more convenient to keep them together in this way, but if you wish, the blankets can easily be separated and the bottoms neatly hemmed. Edges are strongly stitched with mercerized thread giving a firm edge and preventing raveling.

Go through your bedding supplies now—see what you need in blankets for the coming winter. Send for at least two pairs now. Examine them in your own home. If you do not consider them worth at least one-third more and the greatest blanket value you ever saw, simply put them back in the box and return them to us at once at our expense. All of your money will be refunded.

Genuine English Army Blankets

Full size, 60 by 90 inches

Regulation English Army Blankets, 80 per cent pure wool, are a real bargain at this low price. They are from a large surplus stock and bought at a big saving, and imported specially for our customers.

At Ward's we believe that low price alone never makes a bargain. There must be dependable quality as well to insure good value. You may see advertisements of unusually low prices in stores or catalogues, but unless you are sure of the quality too, the low price means nothing. There can be no doubt of the value of these genuine English Army Blankets, for the price is low and their quality is fully guaranteed.

$3.68 Each

Made Since the War—All Are New

These blankets are all new—made since the war, of sturdy gray yarns. They are firmly woven of 80 per cent wool, a fine texture that looks, feels and wears like all wool. Most of them are lightly stamped with the broad arrow—the official mark of approval of the British army inspector. The blankets are all carefully examined again here, to be sure each one is in perfect condition.

Ideal for Outdoor Use

Campers and tourists find them ideal for outdoor use, because they are heavy enough for warmth, and strong enough to stand rough usage. Often used in lumber camps where warm, serviceable blankets are an absolute necessity. They are equally practical for sleeping porches; and splendid to have on hand for "extra" bedroom blankets. You will find them convenient, too, for use in the car, on the lawn, or when you lie down on the couch for a nap. The medium gray color is very practical, as it does not show dirt easily.

Give Excellent Service

These well made blankets are the regular 60 by 90-inch size. Firmly lockstitched edges resist wear, and the close heavy texture insures the durability of the whole blanket. If you want blankets that will stand up under long hard wear, you should order several now at this remarkably low price. Weight, each, about 4¾ pounds.

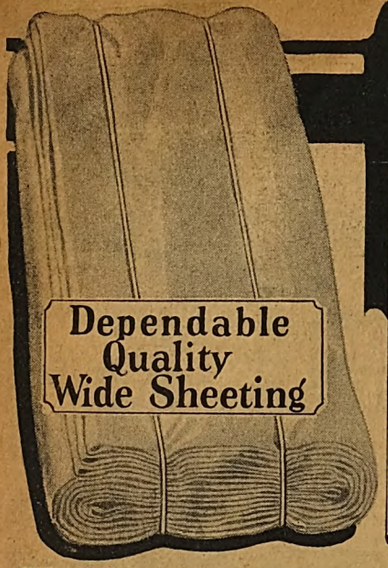
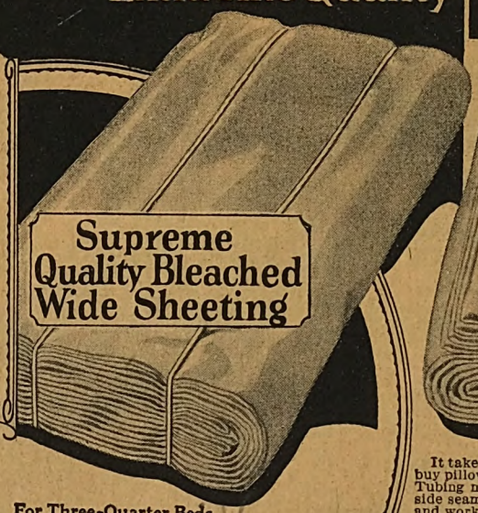
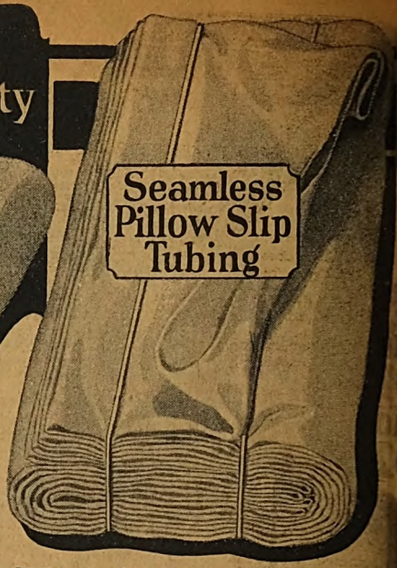
Supreme Ward's Extra Fine Quality



Dependable Quality Wide Sheeting



Supreme Quality Bleached Wide Sheeting



Seamless Pillow Slip Tubing

Supreme Quality Sheeting is our very best grade of cotton sheeting. It is an even better grade than our Longwear, which is standard grade. Supreme sheeting is about the same quality as the well known nationally advertised Pequot or Utica sheetings which usually sell at a much higher price.

Bleached a pure white; free from starching or sizing. Closely woven of select cotton yarns. The widths quoted below are used for making sheets. You will find sheets 18 inches wider than your beds will prove most satisfactory, as this will allow for enough tuck in.

While not as good a quality as our Longwear sheeting, this is nevertheless very durable. It is evenly woven of heavy, serviceable cotton sheeting yarns. Will give lasting and satisfactory wear.

Sale of Silks

$1.48 A Yard

$1.48 A Yard

Silks of the Better Grade

OUR previous sales of these higher quality Silks have been so very successful that we know our customers appreciate the opportunity of securing quality silks at the great savings we offer.

Even though the raw silk costs more than when we first offered these qualities, we are not advancing our prices. They are still 50¢ to $1 a yard less than similar grades can be bought for in most stores.

Here is a weave for most every purpose: Crepe de Chine, Canton Crepe, Satin Messaline or Chiffon Taffeta. Each weave has the luster and beauty, the weight and serviceability that will make you wonder how we can sell them at so low a price.

We can offer these great savings because we bought the raw silk and had it woven in some of the finest silk mills in the country, eliminating several of the usual profits. And, as is Ward's policy, we pass the saving on to our customers by making a price on these wonderful silks of only $1.48 a yard.

Make a Saving on Silks

Since Ward's made its large purchase, prices of raw silk have greatly increased. Silks of this soft, fine quality are sold regularly now for from 30¢ to 50¢ a yard more than we ask for this high quality.

We bought raw silk and had it woven ourselves. This, of course, saves several profits and allows us to make our price even lower to you.

And, too, we had this raw silk made up in weaves we knew our customers would want for Fall and Winter. Crepe de Chine, Georgette Crepe, Satin Messaline and Taffeta are the materials we have had made for this exceptional offer.

Judging from our previous silk sale, we know that our customers greatly appreciate the opportunity to buy good quality merchandise at such low prices.

Only when you see these shimmering Silks and notice their close weave and fine finish, can you fully realize what a remarkable value they are. Order your favorite colors in the fabrics you prefer.

Linens of Exceptional Beauty

WILLIAM CHATTIN
Manager, Notions Department

First of All I Look for Quality Then for Money Saving Prices

The thought which is foremost in my mind when I buy Linens, Art Goods, Laces or Notions is dependable quality. I secure lowest prices by buying in large quantities, buying during slack seasons, buying at the source of supply in our own markets and in foreign markets, and keeping constantly in touch with trade conditions which show us when and how much to buy. But always, and above everything else, I look for Quality.

Linens. The newest, most popular tablecloths and napkins, always of good quality and priced very low.

Art Goods. Beautiful designs stamped on material that is durable and fine.

Handkerchiefs. We searched the markets for handkerchiefs, white and brightly colored linen, lawn, cotton, and silk, for the Christmas season.

Laces. Lace is being used in the fashions for winter to a greater extent than ever before.

Umbrellas. Only strong frames covered with durable covers are listed in this catalogue.

Notions. Look through our notions pages and make a list of the things you will need during the next few months, and include them in your order. You will find them excellent in quality and priced exceptionally low.

You can order from Ward's with the full assurance that you will be pleased with the merchandise and with your savings.

L. A. BILGER, Manager Shoe Department.

You can visit most any large shoe store in the big cities and buy up-to-date stylish Shoes for from $6 to $9 a pair. If you should be offered these very same shoes for $2 to $3 a pair less, you would undoubtedly consider them rare bargains, and tell all your friends about your good fortune. Yet that is exactly the kind of values you get every time you buy shoes from Ward's.

We buy our shoes from the leading shoe factories of the world; the same factories that make shoes for the largest retail shoe stores. We get the very same styles, the very same leather, the same careful workmanship, shoes made on the same lasts and by the same shoemakers. They are not imitations or "copies," but are actually the same shoes in every way. Why shouldn't our shoes be just as good? They *are*; and the only difference is in our prices, which save you from $1 to $3 a pair. And don't forget that when you wear Ward's shoes your feet are just as stylishly and correctly dressed as if you had purchased your shoes in the exclusive shops of the largest cities.

How can we make these low prices on strictly quality shoes? There is no secret about it. Where the average retailer buys in comparatively small quantities, we buy from 12,000 to 25,000 pairs of a single style, and we make a saving of from $1 to $2 on *manufacturing cost alone.* Selling direct to you by mail, we entirely eliminate several "in between" profits which customers usually pay when buying shoes from the average retail store. Naturally, our prices are lower without changing the quality in the least.

Remember that we go only to the factories specializing in certain types of shoes; in women's or men's dress shoes, comfort shoes or work shoes. We have the pick of all the leading factories employing long experienced workmen, which is certainly better than if we were restricted to only one factory and were limited by the ability and experience of only a few men.

L. A. Bilger

Manager.

No Tired Feet No Aching Feet
It Is a Pleasure to Wear Them

A pair of our stylish *Foot-Relaxer* Health Shoes will keep your feet comfortable all the time, especially while you are walking. The scientific design assures complete foot relaxation. They take the place of old fashioned corrective shoes which were the only kind which gave comfort until we designed these attractive *Foot-Relaxer* Health Shoes.

Notice how the shape of this shoe follows the natural lines of the foot. Specially designed narrow heel conforms to the lines of the foot. Durable, high grade oak leather sole bends with your foot, a special process of tanning makes the sole leather extremely flexible.

In designing these shoes we have combined the features approved by many prominent girls' clubs, hiking clubs, college girls and business women. In style they are as smart as any shoes made and in fit and comfort they have no superior. They keep healthy feet in good shape and give comfort to troublesome feet. Genuine Goodyear welt sewed soles are as flexible as the picture shows. Fancy strap slipper is made from choice, high quality black genuine kid leather and has military heel.

The new model fall and winter D'Orsay Oxford is of rich, soft black gunmetal leather and has beautifully perforated patent leather trimming. Shoes of this type are priced at from $6 to $8 elsewhere. Order a pair, wear them; then judge their quality, fit and wonderful comfort for yourself.

Only Leading American Shoe Factories Make Ward's Shoes

Our leadership in Shoe value and style must be deserved, because we sold almost a million more pairs of shoes during the past year than the year before. This great increase is largely due to one thing—our continual searching for America's most fashionable styles which bring you well made, excellent quality shoes at lowest prices. On the pages that follow you will notice that Ward's policy, which is to set the style and not to follow the style, is carried out with the most beautiful footwear that you will find anywhere.

Ward's Fall and Winter Styles Are Creations, Not Imitations

When you select your fall and winter Shoes from Ward's you are absolutely certain of individuality and style. New York women who are known for their up-to-date clothing are wearing footwear no prettier than the styles we show on the following pages. The only difference is they are paying from $6 to $9, while our prices are only $2.39 to $4.98 a pair.

Each style we show is new and stands out among this season's styles as real leaders not only in beauty, but in value as well. It is also of importance to you that you pay no more to dress up your feet with Ward's smart new fall and winter 1925 and 1926 footwear than you would pay elsewhere for last year's styles.

Ward's Quality and Guarantee Safeguard Your Shoe Money

"Quality" is a word that is used by most everybody in describing almost any grade of merchandise. With Ward's, however, quality, first, last and always, means something definitely better. In our shoes you are sure of fine quality because our high standards necessitate that we seek out factories that lead in their particular field.

Whichever style you select, we ask that you look carefully at the materials and workmanship and judge for yourself whether or not we can rightfully call our shoes "quality" shoes. The longer you wear Ward's shoes the more impressed you will become with their quality, and remember Ward's fall and winter styles are creations, not imitations.

Every year more than 100,000 customers buy these Work Shoes with a six months' guarantee. Many of these customers have been buying them for a score of years. The reason for this great demand and continued popularity must be that this shoe offers exceptional value. You will find these shoes very comfortable to your feet, as they are made over the well known Munson Army Last. For full details of construction study the illustration at the top of this page.

Rubbers—Boots—Arctics

WHEN ordering a pair of boots, arctics or rubbers simply place your shoe on a piece of plain paper and draw a line with a pencil around the edge of the sole and heel. If any numbers appear on the inside of the shoe also write them on this paper. Be sure to state whether the rubber is for a high or low heel shoe, as ahigh heel rubber will not fit a low heel shoe, neither will a low heel rubber fit a high heel shoe. By following these simple instructions you will secure rubbers, boots and arctics that fit properly.

4 Big Money Saving Specials

New Fresh Rubber Gives Longer Wear

Every pair of these Boots and Arctics is made from pure gum rubber which comes from the rubber tree in a white, milky form. Our buyers visited the oldest and most reliable rubber factories in America early last year, and made arrangements with them to make better boots and arctics for Ward's to sell at prices which would save more money for our customers. Large contracts were placed for raw materials. Manufacturing plans were made, and now you can buy boots and arctics made of fresh live rubber in America's best factories at low prices.

Ward's Greatest Boot Value

At This Price You Make a Big Saving

$2.98

It will pay you to buy a pair of these standard brand Boots, because the quality and the construction is so very good and the price so low. It is the season's best boot value. Months of planning with the foremost rubber footwear manufacturers in America resulted in this—our greatest boot value. The uppers are heavy, fresh black gum rubber, full lined to prevent sagging. Vamps are a composition of black gum rubber and duck which is extremely long wearing. Thick rubber soles with rolled edges are thoroughly vulcanized to the uppers which makes them very durable and absolutely waterproof. Solid rubber heels. Molded over a full size, shapely last which fits the leg comfortably and snugly. Every pair of these boots is built up to a high standard of quality.

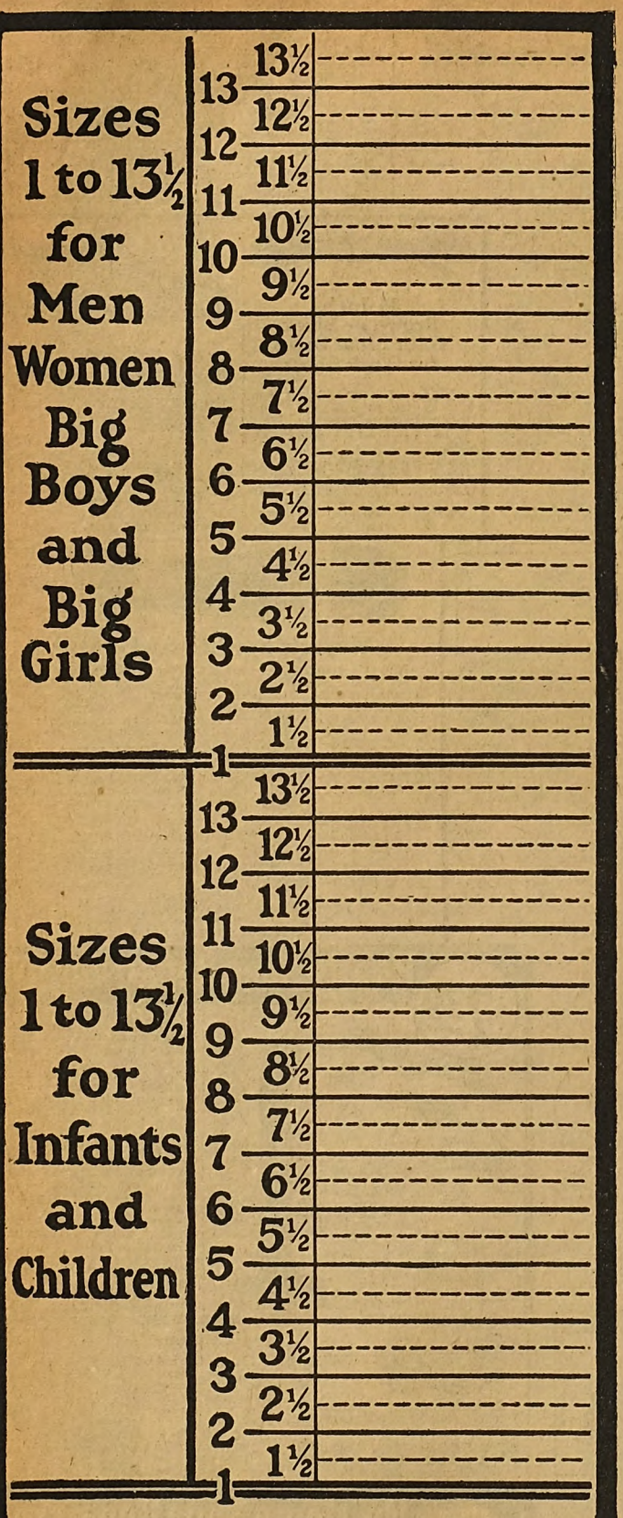
Always Measure the Left Foot



This Measuring Chart will show you the exact size shoe to order. Simply place a stick on end on dotted line at the bottom of chart, and gently place your left foot, with stocking on, against the stick. Before adopting this shoe size chart we measured a great many feet on it, so we are certain it is as accurate as possible. After this chart shows you the length of foot, we advise you to also mention the width—A, B, C, D, etc., which is explained at the right of this page.

Ward's shoes fit splendidly; and if you will give us the correct size, you will be sure of receiving a pair of perfect fitting shoes.

Place Back of Heel at Dotted Line

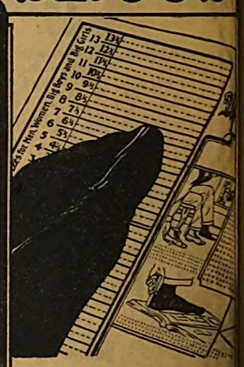
Do Not Remove Stocking

How to Order Ward's Shoes

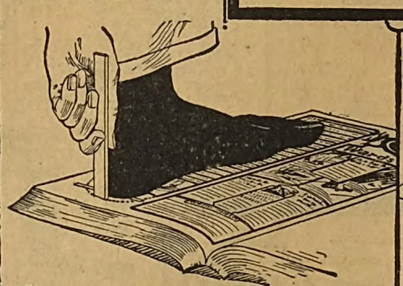
Mention In Your Order

All Numbers In The Shoes You are Now Wearing

Before using the shoe size chart, remove the shoe from the left foot. Then place your foot on the size chart and you will be sure to find your right size.



This illustration shows just how the big toe of your foot touches the line opposite the size you should order. Be careful to notice whether it is a half size or a whole size.



Place a ruler or any stick upright at the dotted line. Place left foot, with stocking on, against the stick as you see in illustration. Number at end of big toe is the correct size of shoe to order.

In addition to measuring your left foot on the shoe size chart, take a piece of plain white paper, rest your foot lightly upon it and draw an outline around your foot. Attach this to your order, as it will help us to fit you perfectly.

It is Easy to Order from Ward's

The four illustrations above show how easy it is for you to find your correct shoe size. Just place the catalogue on a chair, remove your left shoe and put your heel on the dotted line at the bottom of the page, at the same time holding a stick firmly in place on the dotted line. The line appearing nearest the end of the big toe indicates the size shoe you should order.

To make it easy for you to secure perfect fitting shoes we have developed the size chart at the left side of this page. It is necessary for you to measure the children's feet every time you order shoes. No shoes can fit better than ours because the lasts we use were selected by experts. Always use the chart and be sure of getting a well fitting shoe.

Shoe Terms Explained

Solid Leather

Solid Leather means that the outsole, insole, counter and uppers are genuine leather. Solid leather assures long wear and permanent shapeliness.

Turned Sole

The Turned Sole process of fastening the sole to the uppers is desirable because of the extreme flexibility it gives to the sole.

Chrome Leather

The Chrome tanned process makes leather very tough and wear resisting. A chrome mineral substance makes it "wear like iron."

Genuine Goodyear Welt

The Goodyear Welt process of attaching a sole to the upper is founded absolutely on the hand lasted hand sewed and hand finished method. The Goodyear Welt process is universally recognized as being without a peer in all the qualities which make a good shoe comfortable to the feet and long wearing. The Goodyear Welt process makes the most comfortable and most durable type of shoe, and one on which the outsole can readily be renewed. Do not confuse this with goodyear stitched, an inferior process often quoted to secure prestige from the genuine Goodyear Welt process. Goodyear stitched is made without a welt and its use in descriptions is often misleading. Ward's Goodyear Welt sewed footwear for men and women is genuine.

Patent Leather

We use only Chrome patent leather in all our shoes described as "Patent Leather. This quality practically eliminates cracking and peeling.

Side Leather

Side Leather is a name which applies to a fine grade, well finished cowhide leather. Known for its fine appearance, softness and long service.

Stitchdown

This is a sole fastening process which leaves the inside of the shoe very smooth. Used in children's play and dress shoes and barefoot sandals.

Our Laboratory O.K. Is Your Protection

WHENEVER merchandise is offered at much below the usual market prices, you sometimes wonder whether the quality *also* has been sacrificed to get the prices down.

When you buy from Ward's this question is already answered for you. You need have no doubt whatever about Ward's quality, because "keeping up" the quality is a very strict rule here—and has been for over 53 years.

We maintain a large Testing Laboratory. We have chemists of long experience—experts on fabrics—experts on metals—experts on food products. We carefully test samples of every kind of merchandise submitted to us by manufacturers. Unless this merchandise is of such good quality that it passes these careful tests—unless our laboratory certifies it as O.K.—the article is never offered in our catalogue.

When we tell you a material is All Wool, we mean every single thread. If there was 10 per cent cotton we would *tell* you so, because we think you should know it. When we say a pair of shoes is All Solid Leather—*we mean every part of the shoe*—not just the part that shows from the outside—and we take a shoe all apart to make sure. The same is true of everything we offer—paints, groceries, metal products and wearing apparel of all kinds. We know exactly what is in the goods we sell, because we make it our business to *find out.*

Any merchandise of inferior quality can not pass our laboratory tests and is immediately rejected, because we know our customers don't want it at any price.

You know that anybody can make low prices—but how about the quality of the goods? Will you get the service you have the right to expect? Of this you can be positive when you buy from Ward's—where, in our earnest effort to make the lowest prices in America, *we never overlook that one important point—QUALITY.*

For many years we have thoroughly tested *all materials* to protect our customers. When you buy from this catalogue you know exactly what you are getting. And we hope the day will come when the Government will compel every firm selling goods to do the same—to test *everything*—and to tell the public what is in it. Then everyone—no matter where they buy—will know the exact truth about every piece of merchandise. They will also have a definite basis for comparing quality and prices.

Remember, merchandise of different grades appears very similar in a picture, because *pictures can not show quality.* You can buy from Ward's with the full confidence that never in a single detail (whether it shows in the picture or not) is quality ever sacrificed merely for the sake of making a low price.

The asset that we value most highly—the asset that we guard most carefully—is the confidence of our millions of customers located in practically every country in the world. In Ward's policy of fair and square dealing, extending over a period of 53 years, it has been that confidence that has caused the growth of this business. We want always to *deserve* your patronage and your friendship.

English Broadcloth Shirts

Many shirts of English broadcloth are sold in retail stores at about this price or even for less money, but the quality of the material put into them is not to be compared with the broadcloth that is used for these shirts. Ward's Greatest Cap Value $1.39

All Wool—Stylish—Warm—Durable

In order that you may understand how we can sell such a high grade Cap at this low price, we are going to tell you how we made this cap bargain possible. Read every word of this remarkable story.

Because we wanted to offer our customers an extraordinary cap value, we arranged for the purchase of thousands of yards of mill ends—cuttings from high grade All Wool fabrics used in making fine overcoats.

The Retail Value Is More Than $2

If we were to buy this material from the mills in bolts we would have to sell this cap for $2 or more. Then we selected a few of the well known manufacturers—those that had reputations for making fine caps—and had them make up this material.

The combination of reliable makers, fine materials and the special low price is the story of Ward's greatest cap bargain for men.

The cap is exceptionally well made in every detail. Has unbreakable visor and is lined throughout. Inside lined band to pull over the ears.

Genuine Stillson Suits

The Suits That Have Satisfied 155,000 Customers Will Certainly Satisfy You

G. E. JOHNSON, Manager, Men's Clothing Dept.

In all my experience in the Men's Clothing business I never saw a suit that would even compare with a Stillson Suit for wearing quality and value.

I have received hundreds of letters from customers, complimenting us on the quality and excellent fit of these suits—and they tell me that they don't see how we can possibly produce a suit of this quality to sell for $17.85. In fact, most of these men say that a suit of this quality, if purchased at the average retail store, would cost $30 to $40. So I ask you not to judge the quality of a Stillson Suit by its low price.

You, too, will be just as well satisfied and when you consider how much you save on one of these strong, durable suits, you will realize that you can get values here at Ward's that you will not find in any store in the country.

But remember—we have other big values besides Stillson Suits—as a comparison of our prices will readily show. You will find big bargains on every page in this department. I would particularly recommend our Genuine English Overcoat at $25 on Page 250; our $10 Melton Overcoat on Page 252; and for the man who spends much time out-doors our "Big Leader" sheep lined coat on Page 281. For the active school boy, our Champion Long Wearing School Outfit—overcoat, cap, suit and extra knickers, all for $17.06 and those two dressy Extra Quality Suits on Page 264. These are all big values—you will not be able to duplicate them elsewhere.

G. E. Johnson

DID you ever hear of suits so well made, with such good materials and such remarkable values that 155,000 men would buy them from a single concern? That is exactly the record that Stillson Suits have created, and as far as we know, no other suits, regardless of name, make or price, have ever equalled it.

Stillson Suits are worn by men in every part of the country—men who are more interested in getting their money's worth than in paying several "in between" profits when they buy a suit.

Every day we receive letters from these men, stating that suits of this grade material and workmanship would cost at retail from $30 to $40—which proves that Stillson suits are equal in appearance and superior in wearing quality to many suits costing twice as much.

Biggest Purchase of Woolens in Ward's History

When we bought this genuine Stillson Worsted we made the biggest purchase of woolens in our history—and we bought it for a price that would not pay today's cost of the raw wool alone—a price just about one-third the cost of the same material if we bought it today. That is the only reason that we can sell these durable, well tailored suits—the longest wearing suits we have ever seen—for a price less than half their actual value. We mean just that—*less than half their actual value.*

Genuine Stillson Suits are made and sold only by Montgomery Ward & Co. You may see other suits advertised and described so as to resemble Stillson Suits in appearance (pictures cannot show quality)—and the prices may even be lower, but the suits will not be made of 20-ounce Stillson Worsted—that's where you will find the big difference. You might as well have the genuine Stillson Suits bearing the well known Stillson label.

Worth at Least $40

"The $17.85 Stillson Suit I bought from you is giving A-1 satisfaction. Am more than pleased with the fit. I consider a suit of the same material bought in this vicinity would cost me at least $40. Your goods have always been more than up to my expectations. Am pleased with your methods of doing business. I am not making a comparison of your prices and small town prices, but am quoting my experience in buying in large cities."

Stillson Suit O. K.

"I received the Stillson Worsted Suit all O.K., and would say that I'm more than pleased with it. It is fine in workmanship, material and fit. It could not be a better fit. I showed it to a friend of mine and he thought I must have paid around $40 for it. When I told him I only paid $17.85, he could hardly believe it. If there is anybody around here that would like to see my suit, I would be glad to show it."

Guaranteed to Wear One Full Year

Just as Montgomery Ward & Co. was the first mail order house to guarantee merchandise, so were we the first mail order house to offer Stillson suits guaranteed to wear one full year. Our experience in selling 155,000 of these strong durable suits has convinced us that by proper merchandising methods it is possible to produce a stylish suit of extreme durability and sell it at a price that is lower than you would pay in the average retail clothing store for a suit of greatly inferior quality. But you must have the right kind of material to make a suit that will wear one year, and that is just the kind of material Stillson Worsted is.

Will Outwear Two Ordinary Suits

Genuine Stillson Worsted is without a doubt the strongest, most durable All Wool material that we ever saw. It is of medium weight, suitable for year around wear. Firmly, and closely woven, yet soft in texture, will hold its shape well. We have made this material into suits with guaranteed linings, canvas and haircloth stiffening, and the seams are sewed with silk thread. You can give Stillson suits the hardest possible wear, because they are specially made to stand it. **A Genuine Stillson Suit will outwear two ordinary suits.**

Boys' Suits Made from Same Material

The boys' Stillson Suits shown on the opposite page are made from exactly the same material as the men's suits. The average boy is very hard on his clothes. The amount of wear that he will get from a suit depends entirely upon the treatment he gives his clothes. For that reason, it is impossible for us to place the one year guarantee on the boys' suits as we do on the men's. We are quite sure if you buy one of our boys' Stillson Suits you will find it the longest wearing suit your boy ever had.

Tested by Experts

Before we bought this Stillson Worsted we gave it the most thorough tests it is possible to give a piece of cloth, and it stood them all. By actual test 20-ounce Stillson Worsted is more than twice as strong as the average material used in suits selling at anywhere near our low prices.

When a suit is offered to you at a price so greatly below its true value, you naturally want to know what kind of material that suit is made of—and you have a perfect right to know.

The experts in Ward's Testing Laboratory have carefully analyzed this All Wool Genuine Stillson Worsted for you—and we want you to read what these experts have to say about this fine material.

Laboratory Test

The 20-ounce Genuine Stillson Worsted has passed every laboratory test 100%. The material is all Pure Virgin Wool and does not contain one thread of cotton. It is a cloth of tremendous strength, closely woven and will stand the hardest service.

Tests equal to six months constant exposure to the sun did not fade it. Shrinking tests did not affect it in any way. Stillson Worsted is by far the strongest suit material that we have ever tested in this laboratory.

C. R. Yundt, Chief Chemist
Montgomery Ward & Co.

We further guarantee that the Stillson Worsted made into men's suits will give one full year's wear. There are absolutely no "strings" or conditions to this guaranteee. You get one full year's wear from Stillson Worsted or you get a new suit or your money back, whichever you prefer.

Genuine "Thornbury" Model in Warwick Blue or Dark Brown

THIS fine All Wool English Ulster, made in England from soft, warm English woolens, is the very same style overcoat that created such a sensation last fall when we first introduced it to our customers. It was the biggest value in our catalogue. That is exactly what thousands of our customers said after they had received and examined these fine overcoats in their own homes. Our entire stock was sold in 90 days, and we received only the highest praise on the quality and style. For this season we have purchased several thousand more direct from the English manufacturers.

The Kind That Retails for at Least $50

To prove our claims about this stylish, warm, imported coat, we have visited some of the leading retail clothing stores in the country and tried to buy a similar English coat. To match this coat for quality, material and workmanship we had to pay at retail from $50 to $60, which convinces us that this Thornbury model is the greatest overcoat value offered in America. We want you to be the judge.

How This English Overcoat Is Made

When you see this stylish imported coat, feel the soft, warm material, notice the fine tailoring and observe the perfect fit and comfort, you will realize at once why it is so popular with our customers and would undoubtedly buy one immediately at our low price of $25.

Popular ulster style, full 48 inches long, to cover your knees when you sit down; a big advantage all automobile owners will appreciate. Made in England by English tailors, from All Wool English overcoating weighing full 32 ounces to the yard. Big and roomy; double breasted with a big ulster collar, and full belted back. Big patch pockets and roomy sleeves. Yoke and sleeves are lined with high quality imported twilled venetian which has a soft satiny finish and will "wear like iron."

These English overcoats are cut so full that we recommend your ordering the same size as the suit you wear. For instance if you wear a 38 suit, order your English overcoat in size 38. Then you will have a comfortable, well fitting overcoat.

Your Choice of Two Popular Colors

This season we are offering these imported overcoats in two popular colors: the very fashionable Warwick blue—a dark smoke blue; and the ever popular dark brown mixture. We suggest that you order yours early to be absolutely sure of getting one of these fine English coats at less than half the usual retail price.

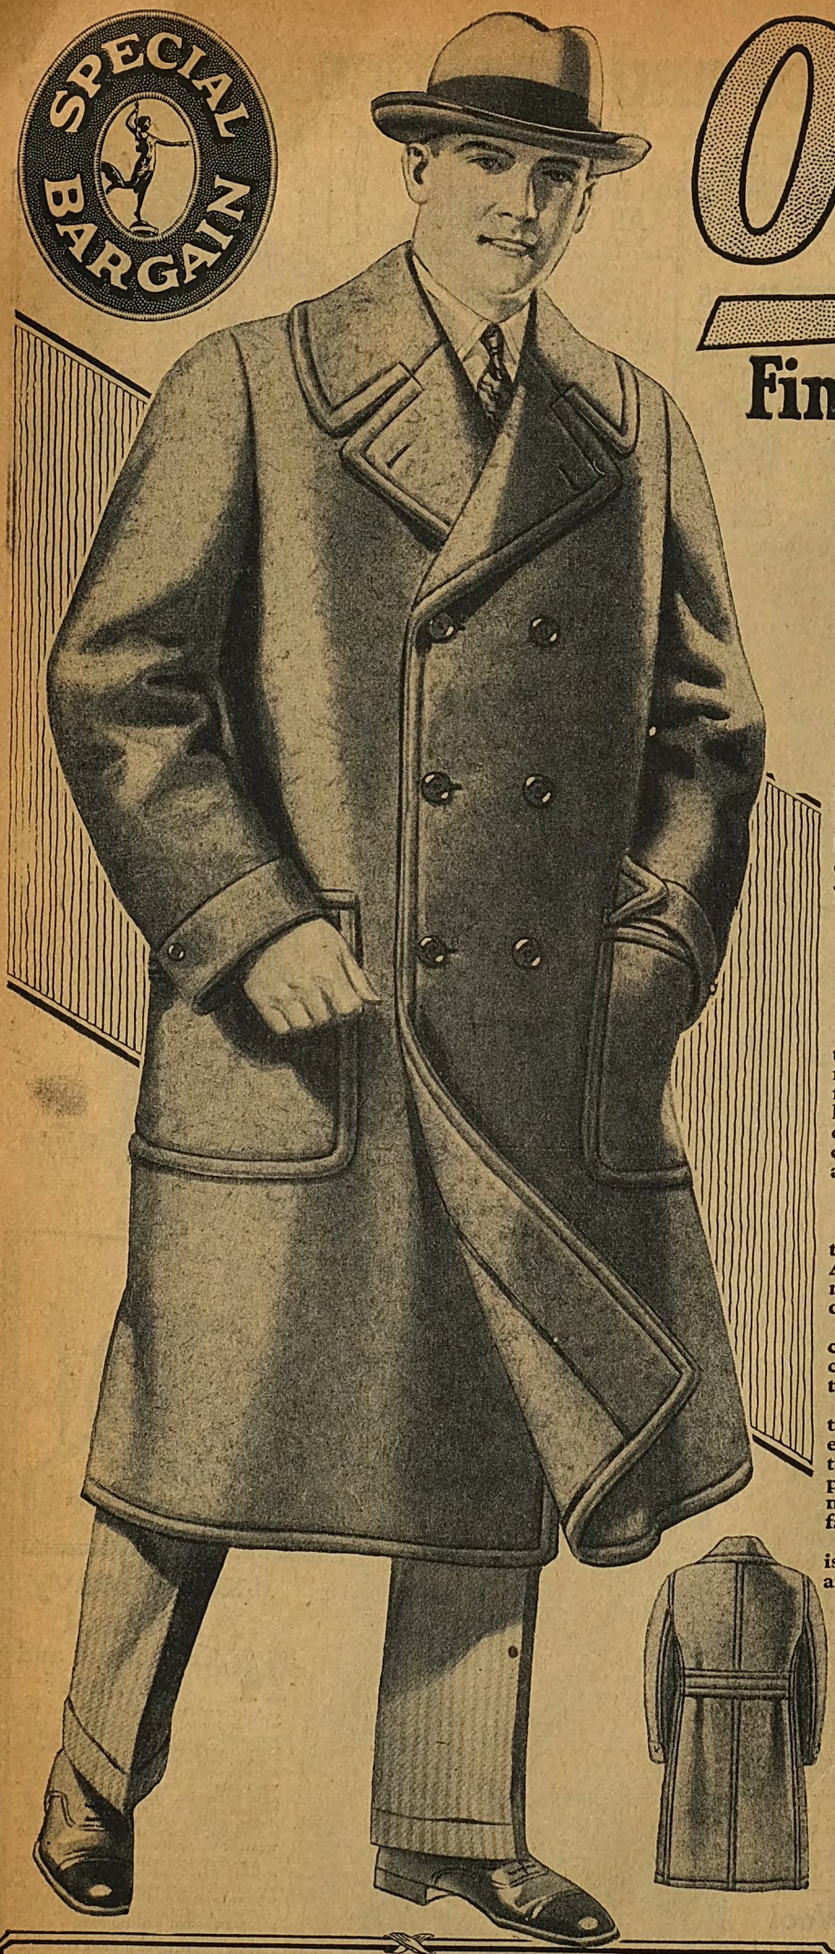
SPECIAL BARGAIN

Only $10 Buys This Fine All Wool Overcoat



READ that message again. Only $10 for an All Wool Overcoat of rich brown 30 to 32-ounce melton cloth. Who can offer you more? Where else can you get as much for so little money?

Bargains like this don't just happen; they are carefully planned months in advance—just like all of Ward's feature sales which have created such big sensations in the last four years.

Nearly a year ago, when we started to plan this great overcoat sale, we were determined to give Ward's customers the greatest overcoat value in America. We believe we have succeeded. This coat is the result, and we are willing to leave it entirely to your own good judgment.

Never before have we offered an All Wool melton coat of this good quality for such a low price. Never before, to our knowledge, has anyone ever equalled this value. It is the big outstanding overcoat bargain of the year; and Ward's customers will be the only ones to benefit by it. So order your overcoat today.

Read Every Word About This Big Warm Overcoat

Genuine melton cloth is one of the best and warmest overcoating materials that it is possible to buy for the money. It is closely woven, heavy weight and very strong and durable. The color is an attractive dark brown which is very serviceable for all around wear.

All New Clean Stock

Right here we say, do not confuse this material with the olive drab Army fabrics that are being used to make so many of the lower priced overcoats today.

Every yard of this material is new, clean fabric, in a rich dark brown color made especially for us for this great overcoat sale.

For all of Ward's feature sales we take advantage of every possible economy to bring the prices down to rock bottom. This sale was planned nearly a year ago. The material was bought and the manufacturing arrangements were made.

In the clothing industry, business is at a standstill during May, June and July. The manufacturer who can keep his organization together and his machines running during this period, has a distinct advantage over other manufacturers when the regular season opens in September. It means that his production costs will be much lower.

The fact of the matter is, many of the larger factories are quite willing to operate at a loss during the slack season, just to be ready with a complete organization when the regular season opens.

It was during this slack season that these overcoats were made, an economy which means a saving to you of at least $5 on each coat.

You Need This Coat

You certainly should have one of these fine overcoats at this low price.

The warmth, comfort and style will appeal to every man who drives an automobile in winter. It will appeal to every farmer; lumberman, stockman, truck driver, railroad man; in fact, any man whose work takes him out of doors in cold weather.

All Wool-Well Made

Being firmly and strongly woven, the All Wool melton has a body that makes it practically windproof. Even more than that, it has strength which safeguards against ripping and tearing.

From our years of experience in the clothing business we know that while the material is important, tailoring is equally important. So we made this coat to very rigid specifications. We specified how it should be made. We insisted on strong seams and reinforcement throughout. The material being warm and heavy, the only lining necessary is the yoke and sleeves, and that lining is a strong satinlike twill.

Excellent Style and Serviceable Dark Brown Color

The style is a popular one—big and ulsterlike with large roomy patch pockets, large warm convertible collar to keep your ears and neck warm when buttoned up. Half belt in back. It is a long coat too, coming to the knees; an average length of about 46 inches.

Now as to color. It is a rich dark brown mixture, the ideal overcoat color because dirt and spots do not show easily. It is a fine looking coat; neat enough for dress wear, yet it can be used for any kind of work.

SIZES: Chest 34, 35, 36, 37, 38, 39, 40, 42 and 44 inches.

Thick Heavy Melton Cloth

Melton is an extremely, closely woven material that wears exceptionally well. Its strength guards against ripping and tearing. This illustration shows the texture and weight of this material. The average thickness is about one-sixteenth of an inch. A picture can not reveal the true quality of this fine material. You will have to see it to appreciate fully its remarkable value.

Test Shows All Wool

When our chemists want to know how much wool is in any material, they simply dip a piece of it in a weak alkali solution. If the material contains any cotton or shoddy, this test is sure to show it.

When this Melton cloth was submitted to this test every bit of the material was dissolved which proves that it is 100 per cent All Wool.

How to Order

Men's, Young Men's and Youths' Clothing

It is a very simple matter to order comfortable fitting clothing from Ward's. All you have to do is send us a few necessary measurements to enable us to select garments of a proper size for you.

All of our clothing is cut over full size patterns to fit the average figure, so do not make extra allowances. State the exact measurements taken as we show in these illustrations; and always state height, weight and age of the person who is to wear the garment. This information is a great help to us in fitting men of unusual build.

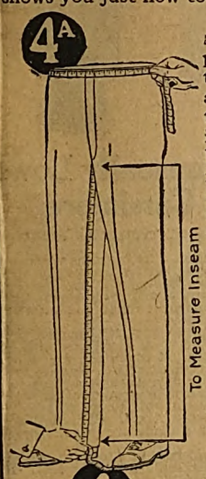
How to Measure

Have Someone Take Your Measurements for You Do Not Try to Measure Yourself

Be Sure to State the Correct Sizes Plainly Written to Avoid Mistakes

Chest. Chest measurement should always be taken over the vest. Place the tape all around the body close up under the arms, and bring forward across the chest. Do not take this measurement too tight, and do not allow tape measure to slip down in the back. Make no allowances. Give exact measurement. See diagram No. 1.

Waist. Place tape measure all around your waist just above the hips over your trousers like a belt. Do not take this measurement too tight for the most comfortable fit. Illustration No. 4-A shows you just how to take this measurement.



Inseam. (Length as indicated by arrows on Figure 4.) To easily find the proper inseam measurement, have the tape measure placed close up in crotch and continue down the inseam of the trouser to the desired length, as shown in illustration No. 4. If you order cuff bottom trousers, the inseam measurement should be a little shorter than for a plain bottom trouser. It is impossible for us to make definite recommendations as to the length because every man has his own idea about how long he wants his trousers to be.

Sleeve Measurement. The easiest way to secure your sleeve measurement is as shown in illustration No. 2. Measure the seam underneath the sleeve of a coat which fits you satisfactorily and if you wish the sleeves shorter or longer, make whatever allowances you wish.

Back Measurement. See illustration No. 3. This measurement is very helpful to us in selecting the proper size coat to give you a comfortable fit.

In Ordering Your Clothing Always State Sizes as Follows

SUITS—Men's, Young Men's or Youths'. Chest measure taken over vest, sleeve measure, back measure taken across back, waist measure, inseam measure. Also state height, weight and age. OVERCOATS—Men's, Young Men's or Youths'. Chest measure taken over vest; also height, weight and age. TROUSERS—Waist measure and inseam measure; also height, weight and age. COATS—Chest measure taken over vest; also height, weight and age. VESTS—Chest measure taken over vest. MEN'S MACKINAWS—Chest measure taken over vest. OVERALLS—Waist measure and inseam measure; also height and weight. OVERALL JACKETS—Chest measure taken over vest.

After you have taken measurements and find the size garments that fit satisfactorily, save these measurements and order same size the next time; except in the case of growing youths, who should be measured each time they order, to allow for growth.

The New "Leathertex" Utility Coat

Looks Like Leather-Wears Better Than Leather Costs Only One-Quarter as Much

Leathertex is a new, durable, long wearing fabric that looks so much like leather that most people can not tell the difference. The tough texture of this material has proved stronger than leather by actual laboratory tests. It is soft and pliable, and even with hardest usage will not scuff, crack or peel. The usual price of a full length leather coat is about $30. Compare that with $6.95, Ward's price for the Leathertex Coat, and notice the big saving you can make.

A Utility Coat for General Wear

Men who drive cars, and those who must be out of doors in all kinds of weather, will especially appreciate this coat. There never has been anything just like it before. Leathertex is windproof, waterproof and practically untearable. Spots, even oil, wash off easily, which makes the coat very practical for motorists.

How the "Leathertex" Coat Is Made

The Leathertex is one of those easy fitting coats that looks so well when you put it on. Young men will like it particularly well. The front is double breasted, with six buttons strongly sewed, and well made buttonholes. Two small matching buttons on each sleeve. Two big roomy patch pockets and flaps, and a collar that can be turned up in windy or stormy weather and fastened with the extra button at neck. Neat half belt and vent in back.

The coat is 45 inches long and well tailored throughout with strongly stitched seams and bound edges. The Leathertex is a wonderful utility coat, and remember Ward's low price of $6.95 makes it one of the outstanding bargains in this catalogue.

How to Order Boys' Clothing

All of Ward's Suits, Overcoats, Raincoats, Mackinaws, Rompers and Knee Pants for boys and little boys are made in the correct average size for each age.

This does not mean that every 10-year-old boy, for example, can wear a size 10-year suit; or that any 4-year-old boy can wear a size 4-year suit. Boys of the same age vary greatly in size—some are large, others small for their age.

It is very easy to find the exact size needed. Simply measure the boy's chest and find the corresponding size in years in the table below. For example, if your boy has a chest measurement of 27 inches, no matter what his actual age may be, you should order size 9 years for him. If you always do this you are sure to fit him comfortably and well.

Ward's boys' Overcoats and Raincoats are cut to fit over an undercoat of the same size. If your boy wears a size 12-year suit, order size 12-year raincoat or overcoat.

How to Find the Size to Order

Measure around the boy's chest over shirt or blouse, as shown in illustration below. See that the tape measure is well up under the arms and that it is over the shoulder blades at the back. After you have the chest measure in inches you can easily find his proper size in years by using the size scale below. For example, if your boy's chest measures 24 inches, order size 5 years. In case your boy's chest measure is between two sizes, order the next larger size.

Champion Long Wearing School Outfit

Your Boy Will Be Proud to Wear These Fine Clothes

YOUR boy takes pride in being well dressed. Most boys do. The very fact that he gives his clothes hard service makes it a matter of real economy for you to insist on good quality—fine, sturdy materials and expert tailoring as well as the smart style that boys like.

Ward's Best Wearing School Outfit

Last winter we offered our customers this Champion School Outfit consisting of suit, overcoat and cap; the best wearing school outfit Ward's has ever offered. Each garment is made of extra fine All Wool material, carefully tailored in our own shops in the newest, most popular styles.

The demand for this outfit has been so great during the past year that there can be only one conclusion: these are just the kind of clothes real boys are proud to wear. And, from the practical point of view, the value is undoubtedly one of the greatest ever offered. When you examine the material, see the strength and wearing quality, the strong sewing and excellent style of these clothes, you will realize what remarkable bargains they are.

Just the Outfit Boys Like

We have received hundreds of letters from parents, praising the materials and workmanship of these garments as well as their wonderful value. Almost every letter tells us how much "the boy" likes his suit and overcoat; how proud he is of their smart, mannish lines and the attractive color. We are printing two of these letters below, so that you may see what parents and boys think of this fine outfit. We feel that this is the best way to prove to you the value, service and satisfaction you can get from Ward's.

Ward's Special Offer

We want you to order at least one of these garments for your boy on our recommendation, backed by Ward's absolute guarantee of satisfaction. Test the material for yourself; examine the fine workmanship and the excellent color. Let your boy try it on and see how well he likes it. To appreciate your savings, compare it for style, material and details of tailoring with suits or overcoats selling elsewhere for from $12 to $15.

Then if you do not feel that this is the greatest boys' clothing value you ever saw, send the outfit back to us. All of your money, including postage both ways, will be promptly refunded. Ward's guarantee of Satisfaction or Your Money Back protects you at all times. And remember, this offer is made by the Oldest Mail Order House in the world.

Proof of Satisfaction

Says the Suit Is Worth $12

"I would have paid at least $12 for this Suit at our local store. The boy likes it fine. It fits perfectly and he feels so well dressed in it. I like the color, the fit, the tailoring and the trim, manly style. No mother can make a mistake in buying this suit for her boys."

A Regular Coat for Active Boys

"An Overcoat purchased in our home town that would give anywhere near the same service, would cost just about twice the price I paid for this coat. It is what you might term a regular coat for an active young American. We are well pleased in every way."

Ward's Extra Heavy Pioneer Overalls "Wear Like Iron"

Strong Construction—Guaranteed Value—Big and Roomy—Priced Low

We always insist first on quality. We buy extra heavy 2:20 white back denim which means that 2½ yards weigh a full pound. The 2:20 denim should not be confused with lighter weights such as 2:60 or 2:80 which are sometimes used in overalls selling at low prices. Always be sure what weight is used in the overalls you buy.

Seams Guaranteed Not to Rip

This is our greatest overalls value. Notice the extra heavy strong material—the way it is sewed together and the big roomy style. And remember we guarantee these overalls not to rip at the seams—a new pair free if they do rip. That is why Ward's Pioneer overalls are so popular with railroad men, mechanics and farmers.

Big and Roomy—Will "Wear Like Iron"

These strong overalls are made for comfort and long wear. Cut over full patterns with full seat to insure proper fit. All strain points are strongly reinforced and seams are all triple lock stitched to make them wear longer. Plenty of roomy pockets and every pocket corner is strongly bartacked to prevent ripping.

High Quality Denim

The metal buttons are riveted on to stay. You will be greatly pleased with the strong substantial construction.

The denim in Pioneer overalls is of very high quality, indigo blue on the outside and white on the inside. The heavy 2:20 white back denim is usually found in overalls much higher in price. The full cut triple-seamed jacket has four large pockets and the overalls have six pockets, including special pockets for watch, pencil and ruler. The low back overalls have detachable suspenders with elastic inserts. High back overalls have suspenders attached.

Do not judge the quality of these good overalls by their low price. The quality of the material and workmanship has not been lowered in any way. Our low price is simply the result of careful buying—when market conditions and prices are right. Send your order today for as many pairs as you need.

Greater Savings Guaranteed

We guarantee that these overalls will cost you less than the same quality in the average retail store. When you receive these overalls make any comparison you wish. If you do not feel they are all we say and that you have saved money, send them back and we will promptly refund your money.

SPECIAL BARGAIN

The Oldest Mail Order House Guarantees This to Be The Lowest Price In America for A Sheep Lined Coat of This Quality and Workmanship

We Sell More Sheep Lined Coats Than Any Other Store in the World

IN the State of Maine, not far from the world's greatest wool market, there is a factory that has been making Sheep Lined Coats for 24 years. That is all this factory makes. Many of the men who cut and fit these coats have been doing this same work year after year, ever since the business started. They are real experts—old timers. That is why this manufacturer has the reputation for making the finest sheep lined coats in the world.

How Our Low Price Is Possible

Ward's has been buying sheep lined coats from this same manufacturer for more than 20 years. We take the entire output of this factory nine months in the year. When we place an order, we know exactly what we are going to get. And we also know that this is the only factory in the country that can make a sheep lined coat of the quality of the Big Leader to sell at our low price.

Absolutely Guaranteed Value

We guarantee that you can not buy at any other store, a sheep lined coat of this quality and workmanship for a price as low as $8.95.

When you buy one of these big warm coats, make any comparisons you wish. Compare it with coats sold elsewhere for from $10 to $12. Compare for quality and weight of materials, appearance and workmanship. Then if you do not honestly feel that the Big Leader is the greatest sheep lined coat bargain you ever saw; or if you do not agree that our price is the lowest in the country for a coat of this quality, you may feel perfectly free to return this coat to us and all of your money, including postage both ways, will be promptly refunded.

Every Outdoor Man Should Have One

The Big Leader is truly a weatherproof coat. It will stand the hardest service, and gives thorough protection against wind and rain. No matter how severe the weather is, the Big Leader with its lining of warm woolly sheepskin will keep you comfortable. No man whose work takes him out of doors should be without one of these warm coats, especially when he can buy it from Ward's at a saving of several dollars.

More Than 150,000 Already Sold

Surely the Big Leader could never gain such popularity if it was not everything we claim it to be. It is a quality coat clear through. Every sheepskin that goes into the lining is carefully selected and graded, to get only the longer fleece. Every lining is cut and fitted by hand. Only the best skins are used for these coats. No "seconds" or imperfect skins are accepted.

High Grade Construction

The outside or "shell" of the Big Leader is made from one of the strongest materials known—heavy 10-ounce Moleskin Twill, dark brown in color; extra strong and durable; does not easily show dirt. Lining of first quality selected sheepskin tanned by best process. Big, warm collar of thick clipped beaverized genuine sheepskin, specially treated. Sleeves are full lined with a strong, closely woven wool and cotton material, similar to mackinaw cloth. Close fitting warm wristlets of All Wool. All around belt. Large reinforced pockets.

This fine, big roomy coat is made in double breasted style with wide lap over in front to keep the chest warm. Seams double sewed throughout to guard against ripping. Coat is made extra full and roomy to fit comfortably. Average length, 36 inches—our most popular length.

Something New Light Weight Rubber Coat

A new and practical style Raincoat, made by the largest manufacturers of rubber goods.
